

I have been a KLOVE supporter and listener for approx. 5 years. What better thing could you want for your community and state that to listen to music that can positively affect your life. Lives are being changed by this radio station and it is becoming increasingly more popular in our state. My husband and I are trying to raise our children in a way that they may grow up to responsible, caring and loving adults. Music is such a part of our lives. Why wouldn't we want them to listen to anything other than music that brings a positive message, rather than them listening to music that is negative in language, some with lyrics with that are degrading to females and different nationalities. Some lyrics depicting that the only way to be accepted is by abusing drugs and having pre-marital sex. The testimonies that have come from the listeners of KLOVE is very encouraging. I would rather listen to nothing at all than for me and my family to listen to some of the garbage that comes over the airways. Even the talk from the DJ's is appalling. They show a great lack of education. Thank you for your time.
